

Text was difficult
to read

Very immersive & interactive, made
me wish I had the ability
to do a project like this to
connect me to my own family
members. The first time we seen
VR to connect to something so
personal.

BRILLIANT,
A THOROUGHLY
IMMERSIVE
EXPERIENCE THAT
ENCAPSULATES A
TRAUMATIC PERIOD
OF HISTORY.

This was an incredible
& moving piece

Thank you

Great story telling experiences and
platform realism. The content was
exceptional and interface is simple
and straight forward

The immersion of the partition
is like reliving the experience thru the
people featured in the story

John W. Tarrance

Parul -

I love this. What a
great way to tell your
grandfather's story.

Wes Modes

- Construct an actual room to inhabit rather than a disembodied void.

- I enjoyed the piece 😊 please don't take my suggestions to mean it was not effective or well done!

Great art installment, Parul!

I'm so impressed by the visual and audio, and what a cool way it is to learn history of India and Pakistan!

♡ Cardya

Amazing work Parul!

Intimate, inspiring, creative and incredibly powerful!

I love you, girl.

♡ Victoria

beautiful, vitally important example of a deep engagement w/ histories of migration, race and gender in VR.

- Loved the texture & intimacy of the personal story & items.

- Letting go of the objects ended the scene abruptly. Consider keeping the ~~same~~ audio playing when I put an item down & only ending it after I pick up a new ^{all the way through} item. Also only play it once. (unless I pick up the same item again later on.)

I cannot love this, being able to view into a different point of time & see what they went through. It would be awesome if the individuals themselves are able to recount their experiences

I loved the approach of exploring the history of an individual to approach India's history with colonialism

most of the documents were difficult to read in VR, and I think I would have engaged even more strongly if I had been able to read them.

I really liked the uniqueness of your project and the use of the VR system. However it was difficult for me to pick up one item at a time. I also kept hitting the table.

Lots of smart VR choices!

Nice use of sound!
I wish the video was 360° though!

Awesome! -KT

I was glad the attendant was present to help use the headset.

I loved staring the historical documents

Great idea. I enjoyed the use of VR to interact with individual objects.

a very cool way to storytell.

most of all, I'm so
sorry about what
appeared in India
in 1947. I had no idea.
Really love you
Ben!

was a really immersive
experience that was fun
to explore and interesting to
learn about

Thank you for the
beautiful experience
of personalizing a very
important part of history
& how the effects on
your family. I enjoyed
being able to see your
handwritten

Thank you for making
very beautiful

pieces, I only wanted

but it was very good

looking at other persons

etc, L

Parul!

So smooth and

well done.

wonderful imagery.

Thank you

for making this!

at least a nice, it feel so
so real, I would
love to see this in
museums.

Thank you for this
wonderful experience

Suit case + read
the documents he
kept.

Thank you,
Holly

I'd recommend making
it a standing one, maybe
no chair. The user should
also have a larger space
to move around. They
should be able to
move 360° around the
table and go under
it and push it around.
The brackets should also
be movable and maybe
a ground track, like after
to walk around on

great
felt like
needed
more
dive

Spending enjoyed in a
week for way to learn
about a historical
and for
maybe
a way to
a way to
a way to
